

I listen to 88.5 xpn. I have listened to this radio station without a problem for years. Lately, I have been having trouble getting the signal in my car and my house. A spanish and/or christian station keeps overriding xpn's signal. I understand that I am on the borderline for getting xpn's signal but I have never had a problem receiving their signal until this other radio station popped up. This spanish station can be found on 88.3. I also don't understand when I travel approximately three blocks from my house I can start to receive 88.5 xpn's signal again. I also don't understand why they are overriding onto 88.5's spot on the radio, since other stations don't do this. Thank you for your time and consideration. Sincerely, Michelle Georgescu
